FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

Dear Magalie Roman Salas,

Omniplex Communications Group, hereby submits an original and four (4) copies of its Intralata Toll Dialing Parity Plan. This filing is made in compliance to the Federal Communication Commission Order dated March 23, 1999, File No L-98-121 and Docket No. 96-98 (Implementation of the Local Competitive Provisions of the Telecommunications Act of 1996).

Any questions regarding this filing can be directed to myself at (314) 537-6730.

Sincerely,

Mark J. Kraus  
Director of Regulatory

**INTRALATA TOLL  
DIALING PARITY PLAN**

**Omniplex Communications Group, LLC**

**June 21, 1999**

---

The IntraLATA Toll Dialing Plan is a proposal intended to provide customers the ability to select the telecommunications carrier of their choice for IntraLATA toll calls. Omniplex Communications Group (Omniplex) is a non-facility based reseller of Local Exchange and IntraLATA/InterLATA Toll services in various states. Omniplex will implement this plan within 30 days of its approval date.

Omniplex will implement the full 2-PIC (Primary Interexchange Carrier) carrier selection methodology. With the full 2-PIC methodology, customers will be able to presubscribe to the same or a different participating telecommunications carrier, including their existing local exchange company, for all intralata toll calls. Orders for changes will be accepted and processed beginning on the implementation date.

Omniplex employees who communicate with the public, accept customers orders, and serve in customer service capacities will be trained to explain the process to customers for making PIC changes for intralata toll calls. Business Office personnel will be prepared to make changes in customer records based upon requests from customers or carriers and direct customers to their chosen intralata carriers. Processes will be in place to provide new customers with an opportunity to choose their intralata toll carrier from a list of available carriers.

On the date in which the intralata toll presubscription is implemented, new customers may presubscribe to Omniplex or any telecommunications carrier offering intralata toll service in their exchange. Existing customers will remain with their current carrier until they affirmatively choose an intralata toll carrier. Customers may make this selection through their own initiative or as a result of the promotional marketing activities of participating intralata toll telecommunication carriers. New customers may communicate their choice of carriers directly to Omniplex, as their local exchange service provider, or indirectly through their selected carriers.

Customers will be assessed a PIC change charge for changing their intralata carrier. When customers request a change in their interlata and intralata carriers during one contact with the Business Office and choose the same carrier for both jurisdictions, only one charge will be assessed. When customers request a change in their interlata and intralata carriers during one contact with the Business Office and choose different carriers for each jurisdiction, two charges will be assessed.

For a waiver period of 30 days from implementation, customers will not be assessed an intralata PIC change charge for their initial intralata toll carrier choice. During the 30-day waiver period, a charge of one-half of the interlata PIC change charge will be assessed when the intralata and interlata carriers are changed to the same carrier during one contact with the Business Office. Only the interlata charge will be assessed when the intralata and interlata carriers are changed to different carriers during one contact with the Business Office during the waiver period. The PIC charge is filed in the Company's respective states General Exchange Tariff.

Omniplex does not provide Directory Assistance and Operator services and the Company relies on the Incumbent Local Exchange Carrier for these customer services. Omniplex will apply a minute of use additive access charge to the carrier for the recovery of cost in implementing this toll dialing parity plan.

Omniplex will be subject to the rules related to slamming in the manner IXC's should confirm PIC change information prior to submitting the information to LEC's. Omniplex as a reseller of local, intralata, and/or interlata services will not disclose or otherwise identify which facilities-based resold services are being used unless the customer requests that information specifically.

New customers who do not make a positive choice for an intralata toll carrier will be identified within Omniplex's system as a no-PIC and will not be automatically defaulted to a carrier. New customers identified as a no-PIC within Omniplex's system will be required to dial 10XXX to place intralata toll calls until they make an affirmative choice for an intralata toll carrier.

Customers will receive information explaining their opportunity to select an intralata carrier a minimum of 30 days in advance of the offering of intralata toll dialing parity via a bill message. In addition, during the 30 days following implementation of intralata Dialing Parity, customers will receive a bill insert also explaining their opportunity to select an intralata carrier. Omniplex anticipates that promotional strategies by carriers will contribute to customer awareness in intralata toll dialing parity. Customers telephone directories will be updated as new editions are published to reflect the opportunity for customers to choose an intralata toll carrier.

Omniplex will fully comply with all the rules of the FCC's Intralata Toll Dialing Parity Plan.
